WORK EXPERIENCE

AI and Automation Intern @ MIRAI School of Technology
Agentic AI & Workflow Automation

- Engineered a **Zero-Touch** platform (AI Venture Planner) automating the pipeline from lead capture to email delivery, **reducing manual intervention by 100%**.
- Designed **Agentic Workflows** in **n8n** to orchestrate data exchange between **Lovable AI** and **Google Gemini**, **cutting workflow execution time by 40%**.
- Optimized LLM outputs using the **RTFC framework** to generate **hyper-personalized** itineraries, achieving **95% relevance** in user results.
- Integrated **Email.js** and **Zapier** to achieve fully automated delivery, ensuring a **sub-2 second** latency user experience.

Skill: n8n, Prompt Engineering (RTFC), Google Gemini API, Workflow Automation, Lovable AI, Zapier.

July '25 – Aug '25
Remote

Technical Wing Core Member @ English Literary Club
Event Operations & Data Management

- Streamlined registration for **5+ major events**, managing digital forms and data for over **200+ attendees**.
- Analyzed post-event feedback to identify trends, using insights to improve attendee engagement by **~20%**.
- Led the digital publication of the club's annual magazine, structuring content for **15+ articles** into accessible formats.

PROJECTS

CodeCollab: Real-time Developer Platform
Backend Infrastructure | Node.js, Express, Socket.io, MongoDB, JWT

- Engineered **backend architecture** using **Node.js** and **Express**, building scalable REST APIs for authentication and storage.
- Implemented **WebSocket events** via **Socket.io** to manage concurrent sessions, enabling **sub-100ms** sync latency.
- Secured routes via **Role-Based Access Control (RBAC)** using **JWT tokenization** and **bcrypt** hashing.
- Orchestrated integration of external **Code Execution APIs**, processing submissions to stream real-time output to the frontend.

Aug '25 – Oct '25

SaralLoan: Conversational AI Loan Assistant
Agentic FinTech Solution | Node.js, Gemini API, MongoDB

- Architected mobile-first underwriting system featuring an **AI-driven chat assistant** for real-time queries and loan offers.
- Engineered a robust **REST API** with **Node.js**, integrating **Google Gemini** for context parsing, **reducing query latency by 30%**.
- Implemented secure **OTP authentication** and deployed microservices architecture on **Render** for high availability.

Mar '25 – Apr '25

Aqua Cloud Innovators (SIH 2023)
Smart India Hackathon Grand Finalist | Sustainable Tech

- Designed biomimetic fog-water harvesting solution utilizing nanotechnology concepts for sustainable water sourcing.
- Created precision 3D models using **Blender** and **Tinkercad** to simulate deployment strategies and ecological impact.
- Achievement:** Secured position as a **Grand Finalist** in Smart India Hackathon 2023 (Team PSID: SIH1328).
